pinball fx2 vr - the walking dead

Another great table for VR. If you love VR and do not want to run out to spend 5, 6, or 7 thousand on a real machine then this is as close as you can get. Good physics, you can nudge V bump machine - be careful not to TILT! anyway this review long over due. We need more like this. Im getting ready to download their universal pack with ET, Jaws, and Back to the Future. I don't care if others complain about the volume increase in those and hopefully the devs will work that out in a future fix.. Pinball FX2 just great work !!! I hope there will be more tables in the future.

Not for small children who are afraid of zombies.. thank you loved the walking dead theme pinball. At -50% the value couldn't be overstated enough, it is a quality well built and designed feature rich table.

After pouring hours in to this table, the challenge is there, for the most part because of the hurry up nature of the main mode. When it becomes apparent on what the main way to progress up to the upper reaches of the score board is, what appears to come easy isn't always so. That makes it accessible to play, giving you the drive to continue.

The only downer on the table is the orbit/loop drain. Nailing the perfect shot on either fly's the ball at an insane speed toward the center drain, you've a 50% chance of catching it with the flips if it's slight of center and you're very quick, no chance if it's totally true, no chance of a nudge either.

On a sale it's a bargain, full price, just as much if you've become invested in the base. Like the other dlc tables, it's one notch up in terms of overall quality, and if your a fan of the walking dead, the table is totally catered to you..
